

Citus™ Cloud Load Test

A powerful yet affordable and on-demand web performance test tool

PRODUCT SUMMARY

Citus™ Cloud Load Test is a powerful and affordable and on-demand test tool that allows simulating up to 100,000 of concurrent users (CCU) to create, schedule, and run performance tests with comprehensive reports through a single Web-based portal.

Your needs, your challenges and our solution

? YOUR NEEDS

A load test solution to check:

- How much traffic, how many daily users your web application can handle?
- Are you really hitting the response times that you're promising your customers in your SLA?

? YOUR CHALLENGES

- Estimate infrastructure, bandwidth and cost;
- Best test applications;
- Scenarios and test scripts;

✓ OUR SOLUTIONS

Citus™ Cloud Load Test:

For performance capacity planning, cloud hosting budget forecast, and cloud load test.

- Azure Cloud + Automation Test;
- Integrated cloud load test portal;
- Manage test plan & test case;
- Automated provisioning for test controller & test agents;
- Automated load test execution;
- Support various reporting tools;

Citus™ Cloud Load Test allows creating, scheduling and running performance tests via a friendly GUI.

This product is based on and compatible with Jmeter.

PRODUCT FEATURES

Citus™ Cloud Load Test creates different workload scenarios to the application in order to understand the application's performance capacity in a specific server configuration, as well as to understand actual server consumption and corresponding hosting cost. . Citus™ Cloud Load Test are available both in the cloud and on desktop and server configurations.

How Citus™ Cloud Load Test improves performance testing experiences

EASY TO USE

A friendly central GUI allows configuring test inputs, scheduling test runs and reading reports as part of a streamlined workflow

HIGH CAPACITY

Test cases support up to 100,000 concurrent user simulations

CLOUD SUPPORT

Support for Microsoft Azure Cloud and Amazon AWS

COMPREHENSIVE REPORT

Application performance analyzed in detailed & visualized reports

SECURE SYSTEMS TESTING

Authentication Testing & POST Method Available to test secure and internal systems which requires user authentication for proxy bypassing

Support team available at your service
24/7

Competitive & flexible subscription models to meet your business needs: it comes with 4 versions: 200, 1000, 2500 & 5000 CCUs.

PRODUCT TRACKRECORD

Citus™ Cloud Load Test had been validated through numerous projects within FPT Software before officially commercialized in 2014.

W

hat customers say about our product?

Our Customer

"Absolutely suitable tool for Cloud transformation. It saves tremendous effort and productivity increases much better."

Our Partner

"The technical teams have deeply knowledge and very supportive. I love using it"
