### Global Competition

Dream it. Build it. Live it.

The next big thing could come from you. Facebook and Twitter started as student projects. Your ideas could be next. The Imagine Cup is here to help you take the first steps. It's a global contest for the most original student applications, and the winning team will take home up to \$100,000 (US).

**Incredible, world-changing software innovations** often come from students. Social networks, music services, photo apps, games, gadgets and robotics – the list goes on. We're looking for the next big thing and we know students like you are going to make it. Imagine Cup, Microsoft's premier international competition for young developers, is your chance to show off your biggest, boldest software solution. **Code with purpose** and show the world what you've got.

This competition is the doorway to your success. If you can win here, you can win anywhere. If you've got a great idea, assemble a great team and work hard to bring that idea to life. Your project could be on devices all over the world, changing lives and giving people the thrill of seeing the future come to life right before their eyes.

Whatever your innovation, you can make an impact and win big – **like, \$100,000 big** – with Imagine Cup. With prizes that includes mentorship opportunities with industry leaders, an Azure grant and cash, Imagine Cup can help you take your project to the next level.
