## Description

Staple Publishing features

Creates a Microsoft OneNote 2010 notebook in the Shared Documents library and places a link to it on the Quick Launch. This feature requires a properly configured WOPI application server to create OneNote 2010 notebooks.

Makes the following Web Parts available in the site collection Web Part catalog: Page Viewer, Content Editor, Image, Form, XML and Site Users list.

Provides support for XML form libraries for a site.

Provides support for links lists for a site.

This feature provides the ability to create a list to support running custom form actions.

Provides support for editing custom lists in a grid for a site.

Provides support for workflow history lists for a site.

Provides team collaboration capabilities for a site by making standard lists, such as document libraries and issues, available.

Provides support for Gantt-chart tasks lists for a site.

Provides support for picture libraries for a site.

Provides support for issues lists for a site.

Provides support for discussion boards for a site.

Provides support for contacts lists for a site.

Provides support for external lists for a site.

Provides support for tasks lists for a site.

An interconnected set of easily editable web pages, which can contain text, images and web parts.

Provides support for announcements lists for a site.

This site feature will create a wiki page and set it as your site home page.

Provides support for custom lists for a site.

Provides support for document libraries for a site.

Provides support for surveys lists for a site.

Provides support for events lists for a site.

Provides support for data source libraries for a site.

Provides support for no-code workflow libraries for a site.

Link to display the feature pushdown page

Workflows that send a document for feedback or approval.

My Site feature that uploads all the layouts to the master page gallery

`$Resources:SearchEndUserHelp_Feature_Description;`

PerformancePoint Datasource Content Type definition

Allows list administrators to override content type retention schedules and set schedules on libraries and folders.

SharePoint Portal Server Status Indicator List template

Enable enhanced .thmx theming.

Links to the Shared Services administration pages

Creates the Help library that can be used to store product Help.

Features such as Visio Services, Access Services, and Excel Services Application, included in the SharePoint Server Enterprise License.

This feature provides support for Manage Resources list types.

This feature activates the Health ReportsLibrary.

Links to subpages and Ribbon for Tenant Business Data Connectivity Administration

Aggregated set of out-of-box workflow features provided by SharePoint.

Features enabling the PerformancePoint Services list and document library templates.

Create a slide library when you want to share slides from Microsoft PowerPoint, or a compatible application. Slide libraries also provide special features for finding, managing, and reusing slides.

Deprecated Office Web Apps

Provision resources required for routing documents in sites within this site collection.

Features such as Visio Services, Access Services, and Excel Services Application, included in the SharePoint Server Enterprise License.

Provides several standard user interface components and links.

Installs and uninstalls Farm-level job for My Site Cleanup.

Shared Services Navigation

Contains the converters used to convert documents to publishing pages.

This site collection feature provides Group Approval. 'Group Approval' site feature must be activated afterward to use this feature.

SharePoint Portal Server Local Site Directory Capture Control

Enables tenant administration of InfoPath Forms Services

Deprecated Office Web Apps

This feature provides Publishing Approval workflow for a language (ar-sa)

This feature provides Publishing Approval workflow for a language (zh-tw)

This feature provides Publishing Approval workflow for a language (cs-cz)

This feature provides Publishing Approval workflow for a language (da-dk)

This feature provides Publishing Approval workflow for a language (tr-tr)

This feature provides Publishing Approval workflow for a language (sl-si)

This feature provides Publishing Approval workflow for a language (lv-lv)

This feature provides Publishing Approval workflow for a language (lt-lt)

This feature provides Publishing Approval workflow for a language (hi-in)

This feature provides Publishing Approval workflow for a language (zh-CN)

This feature provides Publishing Approval workflow for a language (pt-PT)

This feature provides Publishing Approval workflow for a language (es-ES)

Enables the creation of new sites from uploaded Access template files.

This site feature provides Group Approval. This feature can be activated only in the root web of site collection. 'Group Approval' site collection feature must be activated first.

Create Microsoft IME dictionary list when you want to use data in the list as Microsoft IME dictionary. You can convert "Reading" field items to "Display" using Microsoft IME and view the content in "Comment" in the IME comment window. The data can be linked to a specific URL.

Adds farm-level Access Services 2010 Features to the Microsoft SharePoint Foundation framework

Provisions the Search and Process timer jobs.

DLC Document Management content type setting links.

Create Publishing timer jobs in the web application to support scheduling and variations.

Enable Publishing in a web.

This feature provides support for Phone Call Memo list types.

SharePoint Portal Server Report Library

Contains ODC, UDC and PerformancePoint data connections.

Access Services User Application Log

Create a translation management library when you want to create documents in multiple languages and manage translation tasks.

Translation management libraries include a workflow to manage the translation process and provide sub-folders, file versioning, and check-in/check-out.

Access Services System Objects

Microsoft SharePoint Foundation Search feature

Adds additional default groups the QuickAddGroups column in webpart gallery

Portal feature that uploads upgrade only files.

Add new masterpages and CSS styles

SharePoint Portal Server Redirect Page Content Type Binding Feature

Installs additional web parts common to all types of sites.

Links to subpages for Tenant User Profile Application Management

Content type syndication.

Secure Store Service Admin Ribbon

Enables FAST Search Central Admin Help Collection

Email templates used to send out some notifications from SharePoint

Business Intelligence center sample data feature which adds sample data to the newly created Business Intelligence center site.

Extends the Web Part adder to display Meetings Workspaces list templates.

Provides the infrastructure to synchronize metadata for Document Sets.

Provides the content types required for creating and using document sets. Create a document set when you want to manage multiple documents as a single work product.

This feature provides Routing Workflows for a language (ar-sa)

This feature provides Routing Workflows for a language (zh-tw)

This feature provides Routing Workflows for a language (cs-cz)

This feature provides Routing Workflows for a language (da-dk)

This feature provides Routing Workflows for a language (de-de)

This feature provides Routing Workflows for a language (el-gr)

This feature provides Routing Workflows for a language (fi-fi)

This feature provides Routing Workflows for a language (fr-fr)

This feature provides Routing Workflows for a language (he-IL)

This feature provides Routing Workflows for a language (hu-HU)

This feature provides Routing Workflows for a language (it-it)

This feature provides Routing Workflows for a language (ja-jp)

This feature provides Routing Workflows for a language (ko-KR)

This feature provides Routing Workflows for a language (nl-nl)

This feature provides Routing Workflows for a language (nb-no)

This feature provides Routing Workflows for a language (pl-pl)

This feature provides Routing Workflows for a language (ru-RU)

This feature provides Routing Workflows for a language (sk-sk)

This feature provides Routing Workflows for a language (sv-se)

This feature provides Routing Workflows for a language (th-TH)

This feature provides Routing Workflows for a language (tr-tr)

This feature provides Routing Workflows for a language (sl-si)

This feature provides Routing Workflows for a language (lv-lv)

This feature provides Routing Workflows for a language (lt-lt)

This feature provides Routing Workflows for a language (hi-in)

This feature provides Routing Workflows for a language (zh-CN)

This feature provides Routing Workflows for a language (pt-PT)

This feature provides Routing Workflows for a language (es-ES)

Enables tenant administration of InfoPath Forms Services Web Service Proxy settings

Adds site-level Excel Services Application viewing features to the Microsoft SharePoint Foundation framework

Deprecated Office Web Apps

Staple Tenant User Profile Application Feature to TenantAdmin Template

Provides tree view navigation for a site.

Staples the Field Added feature to all sites created

SharePoint Portal site templates and web parts

SharePoint Portal Server Business Application content type definitions

Uses the Search Server Service for search over broad enterprise content. In addition to list and site scopes, provides search over people profiles, business data, remote and custom content sources. Uses multiple tabs to display results in the Search Center.

PerformancePoint Content List

Creates the taxonomy timer jobs on all web apps being created

Installs features related to hosting My Sites.

Enable Asset Library Creation for site collection.

Adds site-level Excel Services Application web part features to the Microsoft SharePoint Foundation framework

Features such as user profiles and search, included in the SharePoint Server Standard License.

Set per-site navigation properties.

This feature activates the Administrative Reporting Infrastructure feature in all site templates.

Creates a Help library that can be used to store custom help for this site collection.

This feature provides support for Resources list types.

Adds farm-level Excel Services Application Mobile Excel Web Access Feature to the Microsoft SharePoint Foundation framework OOB field definitions for Biz Apps

Provision resources required for creating records or holds in sites within this site collection.

PerformancePoint Data Source Library Template

Search extensions

Use this Picture Library to store logos for Organizations.

Portal feature that uploads all the layouts to the master page gallery.

View Visio Web Drawings in the browser

Enable the Spell Checking in list-item edit forms.

Stapling Secure Store Service Tenant Administration to Tenant Administration template.

This feature provides support for Schedule and Reservations list types.

Enables UI for creating or upgrading BDC profile pages.

My Site feature that uploads all the layouts to the master page gallery.

Provides standard content type definitions for a site collection.

Installs features related to My Site and User Profiles.

Installs navigation providers for My Site.

Gathers signatures needed to complete a Microsoft Office document.

Adds records management and information management policy capabilities to Microsoft SharePoint Foundation.

Provides support for document libraries for a site.

This feature provisions Group Work's web.

Enables FAST Search End User Help Collection

Creates reports about information in Microsoft SharePoint Foundation.

Portal feature that sets the DiscoPage property of the default web service to spsdisco.aspx.

Provides each list in the site with a settings pages for configuring that list to use metadata tree view hierarchies and filter controls to improve navigation and filtering of the contained items.

Registers the field added event on all SP Sites being created

Enables uploading Access template files to the solution gallery.

InfoPath Forms Services admin links.

Adds entry points for social tagging and note board commenting to the ribbon user interface.

Create a large-scale wiki site.

adds the url of search center in the property bag of root web.

Search Center URL Feature.

Create metadata based rules that move content submitted to this site to the correct library or folder.

When this feature is enabled, permissions for users in the "limited access" permissions level (such as Anonymous Users) are reduced, preventing access to Application Pages.

Enables taxonomy tenant administration.

Visio Process Repository document library feature

Visio Process Repository document library feature

Visio Process Repository document library feature

Enhanced HTML Editing for the Content Editor Web Part

Add a library template to manage the document translation process.

PPS Site Stapling

Features such as InfoPath Forms Services, Visio Services, Access Services, and Excel Services Application, included in the SharePoint Server Enterprise License.

Installs My Site Blog features.

Helps you to visualize your data on SharePoint sites and portals.

Enable portal navigation bars.

Configures links to documents so they open in client applications instead of Web applications, by default.

SharePoint Portal Server Master Site Directory Capture Control.

This feature allows you to turn the front page of your Wiki Site into a Wiki Page.

Provides access to the site collection upgrade and repair logs

The feature is a web part to display popular content, search queries and search results.

Feature that sets location to local site directory for site metadata capture

Activates taxonomy related features in the tenant administration site.

Staples Profile Pages feature to sites that use the tenant admin template.

Use this feature to enable users to rate content.

Link to display the portal to office server sku upgrade page

Create a Web page library as well as supporting libraries to create and publish pages based on page layouts.

Staple Base features

Links to Tenant Administration subpages which reside on the main Tenant Administration page.

Allows Tenant Administrators to configure Content Deployment for their sites.

Features such as user profiles and search, included in the SharePoint Server Standard License.

Provisions a site to be Enterprise Metadata hub site.

This feature provides support for Holidays list types.

Installs Claim Hierarchy Provider based on Organizations.

Provides Calendars with added functionality for team and resource scheduling.

\$Resources:core,GbwwFeatureWhereaboutsDescription;

This feature is used to track external actions like litigations, investigations, or audits that require you to suspend the disposition of documents.

View Visio Web Drawings in the browser

InfoPath Forms Services lists and related pages to enable server side rendering of Forms.

InfoPath Forms Services admin links.

This feature enables entry points from the SharePoint user interface that allow users to browse SharePoint solutions from Office.com

Features enabling the PerformancePoint Services site including content types and site definitions for this site collection.

Feature that creates sites list and registers event receivers

Enable Publishing prerequisites for site collection.

This feature provides Collect Signatures workflow for a language (ar-sa)

This feature provides Collect Signatures workflow for a language (zh-tw)

This feature provides Collect Signatures workflow for a language (cs-cz)

This feature provides Collect Signatures workflow for a language (da-dk)

This feature provides Collect Signatures workflow for a language (de-de)

This feature provides Collect Signatures workflow for a language (el-gr)

This feature provides Collect Signatures workflow for a language (en-US)

This feature provides Collect Signatures workflow for a language (fi-fi)

This feature provides Collect Signatures workflow for a language (fr-fr)

This feature provides Collect Signatures workflow for a language (he-IL)

This feature provides Collect Signatures workflow for a language (hu-HU)

This feature provides Collect Signatures workflow for a language (it-it)

This feature provides Collect Signatures workflow for a language (ja-jp)

This feature provides Collect Signatures workflow for a language (ko-KR)

This feature provides Collect Signatures workflow for a language (nl-nl)

This feature provides Collect Signatures workflow for a language (nb-no)

This feature provides Collect Signatures workflow for a language (pl-pl)

This feature provides Collect Signatures workflow for a language (ru-RU)

This feature provides Collect Signatures workflow for a language (sk-sk)

This feature provides Collect Signatures workflow for a language (sv-se)

This feature provides Collect Signatures workflow for a language (th-TH)

This feature provides Collect Signatures workflow for a language (tr-tr)

This feature provides Collect Signatures workflow for a language (sl-si)

This feature provides Collect Signatures workflow for a language (lv-lv)

This feature provides Collect Signatures workflow for a language (lt-lt)

This feature provides Collect Signatures workflow for a language (hi-in)

This feature provides Collect Signatures workflow for a language (zh-CN)

This feature provides Collect Signatures workflow for a language (pt-PT)

This feature provides Collect Signatures workflow for a language (es-ES)

Routes a page for approval. Approvers can approve or reject the page, reassign the approval task, or request changes to the page. This workflow can be edited in SharePoint Designer.

Access Services Restricted List Definition

This feature provides support for Circulation list types.

Staple Premium features

Create a large-scale wiki with categories and page layouts.

Enable Publishing for site collection.

Adds the process all tasks button to complete workflows in bulk

Installs job for user profile and membership synchronization with team sites.  
Features such as user profiles and search, included in the SharePoint Server Standard License.  
Deprecated Office Web Apps

Assigns IDs to documents in the Site Collection, which can be used to retrieve items independent of their current location.  
Workflows that send a document for feedback or approval. These workflows can be edited in SharePoint Designer.  
Staple Tenant Business Data Connectivity Administration Feature to TenantAdmin Template  
Provides standard Site Upgrade links for a site.  
\$Resources:obacore,tenantadminbdcFeatureDesc;  
Library for administrative reporting.  
Uses the Search Server Service for site and list scoped searches.  
Adds Access Services Site Actions Menu Items.  
Installs links related to administering the User Profile service.

Gathers signatures needed to complete a Microsoft Office document. This workflow can be edited in SharePoint Designer.  
Manage Profile Service Application.  
Creates a sample dashboard in the ReportsLibrary of the parent Report Center

Manages document translation by creating copies of the document to be translated and assigning translation tasks to translators.  
This feature uploads all web parts required for Search Administration Dashboards.  
Adds farm-level Excel Services Application web part features to the Microsoft SharePoint Foundation framework  
Aggregated set of out-of-box workflow features provided by SharePoint 2007.

Manages document expiration and retention by allowing participants to decide whether to retain or delete expired documents.  
InfoPath Forms Services lists and related pages to enable server side rendering of Forms.  
Search Central admin Links.  
This feature provides support for Microsoft Office Server workflows.  
OOB Content Deployment Feature.  
Provides standard column definitions for a site collection.  
Adds Data Connection Library feature  
Enables offline synchronization between external lists and Outlook.  
Installs the "Add Dashboard" Link in Site Actions menu.  
Provisions ESS\_SHORT\_NAME\_RTM Master Job.  
Publishing Layouts  
Enable a site's content organizer to accept and organize email messages. This feature should be used only in a highly managed store, like a Records Center.  
This feature provides support for Time Card list types.  
Enables the Access Services Solution Gallery feature in each site collection that is created.  
This feature provides support for What's New list types.  
The timer job that processes workflow tasks in bulk  
Enable the definition and declaration of records in place.  
Content type publishing.  
\$Resources:SearchServerWizard\_Feature\_Desc;  
Configures a site as a Records Center.  
Adds farm-level Excel Services Application viewing features to the Microsoft SharePoint Foundation framework  
\$Resources:HealthReportsFeatureDesc;  
Related Links scope settings page  
Site Settings Link to Local Site Directory Settings page.

Adds site-level Excel Services Application Mobile Excel Web Access Feature to the Microsoft SharePoint Foundation framework  
This feature uploads all web parts and support files required for Search Center.  
Personalization Site Description  
Out-of-Box Search Portal admin Links.  
Workflows activated automatically upon site collection creation  
PerformancePoint Monitoring  
Installs features related to migrating user data when a user's account information changes.  
Shared Services Infrastructure  
Provides a shortcut URL (/m) to a mobile device-accessible version of the list.  
PerformancePoint Content Type Definition

Add Published Links fields and content type

Configures a user's personal site.

Provides centralized libraries, content types, master pages and page layouts and enables page scheduling and other publishing functionality for a site collection.

Dashboards Library Description

Enables offline synchronization for external lists with Outlook and SharePoint Workspace.

Installs a button on the List Settings page to enable content targeting using audiences.

Use this workflow to track items in a list.

Provides standard Site Settings links for a site.

Provides standard links for the Content Type Settings page.

Links for the Operations and Application Management pages in the Central Administration site.

Adds entry points in the ribbon user interface for creating library shortcuts in the user's SharePoint Sites list if they have a recent version of Office installed. Office will periodically cache templates available in those libraries on the user's local machine.

Staple Publishing features

Creates a Microsoft OneNote 2010 notebook in the Shared Documents library and places a link to it on the Quick Launch. This feature requires a properly configured WOPI application server to create OneNote 2010 notebooks.

Makes the following Web Parts available in the site collection Web Part catalog: Page Viewer, Content Editor, Image, Form, XML and Site Users list.

Provides support for XML form libraries for a site.

Provides support for links lists for a site.

This feature provides the ability to create a list to support running custom form actions.

Provides support for editing custom lists in a grid for a site.

Provides support for workflow history lists for a site.

Provides team collaboration capabilities for a site by making standard lists, such as document libraries and issues, available.

Provides support for Gantt-chart tasks lists for a site.

Provides support for picture libraries for a site.

Provides support for issues lists for a site.

Provides support for discussion boards for a site.

Provides support for contacts lists for a site.

Provides support for external lists for a site.

Provides support for tasks lists for a site.

An interconnected set of easily editable web pages, which can contain text, images and web parts.

Provides support for announcements lists for a site.

This site feature will create a wiki page and set it as your site home page.

Provides support for custom lists for a site.

Provides support for document libraries for a site.

Provides support for surveys lists for a site.

Provides support for events lists for a site.

Provides support for data source libraries for a site.

Provides support for no-code workflow libraries for a site.

Link to display the feature pushdown page

Enables autohosted app licensing UI for app catalog sites.

Workflows that send a document for feedback or approval.

My Site feature that uploads all the layouts to the master page gallery

Adds links to SharePoint Central Administration for managing classes and institution data.

`$Resources:SearchEndUserHelp_Feature_Description;`

This feature enables redirection back to the My Site from linked SharePoint tasks.

PerformancePoint Datasource Content Type definition

Allows list administrators to override content type retention schedules and set schedules on libraries and folders.

SharePoint Portal Server Status Indicator List template

Enable enhanced .thmx theming.

Links to the Shared Services administration pages

Creates the Help library that can be used to store product Help.

This feature uploads files for Search Server center lite.

Features such as Visio Services, Access Services, and Excel Services Application, included in the SharePoint Server Enterprise License.

This feature provides support for Manage Resources list types.

Adds Class and group content that are shared across SharePoint site collections.

This feature provisions the User Profile User Settings Provider.

\$Resources:TenantAdmin\_SearchAdminFeatureStapling\_Description;

This feature activates the Health ReportsLibrary.

Links to subpages and Ribbon for Tenant Business Data Connectivity Administration

Provisions a catalog to distribute apps to your organization

Aggregated set of out-of-box workflow features provided by SharePoint.

Features enabling the PerformancePoint Services list and document library templates.

Create a slide library when you want to share slides from Microsoft PowerPoint, or a compatible application. Slide libraries also provide special features for finding, managing, and reusing slides.

Deprecated Office Web Apps

Provision resources required for routing documents in sites within this site collection.

\$Resources:core,blogContentFeatureDesc;

Features such as Visio Services, Access Services, and Excel Services Application, included in the SharePoint Server Enterprise License.

Enables MySite storage features.

Provides several standard user interface components and links.

Installs and uninstalls Farm-level job for My Site Cleanup.

Shared Services Navigation

Feature required to improve Share with Everyone UI

Visio Process Repository 2013 Content Types

Contains the converters used to convert documents to publishing pages.

This site collection feature provides Group Approval. 'Group Approval' site feature must be activated afterward to use this feature.

SharePoint Portal Server Local Site Directory Capture Control

Enables site collection to designate lists and document libraries as catalog sources for Cross-Site Collection Publishing.

Enables tenant administration of InfoPath Forms Services

Enables the use of site feeds.

Deprecated Office Web Apps

Search Engine Optimization Feature enables SEO specific HTML meta elements, specialized editing of SEO properties and more.

Academic Library Site.

This feature makes the Promoted Links list template available to this site.

This feature provides Publishing Approval workflow for a language (es-ES)

Enables the creation of new sites from uploaded Access template files.

Enables tenant admins and central admins to monitor apps

This site feature provides Group Approval. This feature can be activated only in the root web of site collection. 'Group Approval' site collection feature must be activated first.

Create Microsoft IME dictionary list when you want to use data in the list as Microsoft IME dictionary. You can convert "Reading" field items to "Display" using Microsoft IME and view the content in "Comment" in the IME comment window. The data can be linked to a specific URL.

Adds farm-level Access Services 2010 Features to the Microsoft SharePoint Foundation framework

Provisions the Search and Process timer jobs.

Provision sample data for Academic Library Site.

Displays a list of documents recently accessed by the user.

DLC Document Management content type setting links.

Make the data stored in this SharePoint site available using the Content Management Interoperability Services (CMIS) standard.

Create Publishing timer jobs in the web application to support scheduling and variations.

Enable Publishing in a web.

This feature provides support for Phone Call Memo list types.

Create and manage eDiscovery cases.

SharePoint Portal Server Report Library

Contains ODC, UDC and PerformancePoint data connections.

Access Services User Application Log

Create a translation management library when you want to create documents in multiple languages and manage translation tasks.

Translation management libraries include a workflow to manage the translation process and provide sub-folders, file versioning, and check-in/check-out.

Access Services System Objects

Microsoft SharePoint Foundation Search feature

This feature adds community portal functionality. It also provisions community portal pages.

workflow service store

Enable Mobile Browser View feature stapling

Adds class and group lists to the SharePoint Community site collection.

Adds additional default groups the QuickAddGroups column in webpart gallery

Portal feature that uploads upgrade only files.

Add new masterpages and CSS styles

Allows site collection administrators to define retention schedules that apply to a site and all its content.

SharePoint Portal Server Redirect Page Content Type Binding Feature

Installs additional web parts common to all types of sites.

Links to subpages for Tenant User Profile Application Management

Provisions a place for storing requests for SharePoint Apps.

Content type syndication.

Enables tenant admins and central admins to monitor apps

Secure Store Service Admin Ribbon

OOB field definitions for Reports and Data

This feature uploads files for Search Server center.

Enables FAST Search Central Admin Help Collection

Email templates used to send out some notifications from SharePoint

Business Intelligence center sample data feature which adds sample data to the newly created Business Intelligence center site.

Adds recommendations CBS control to all item display forms.

Extends the Web Part adder to display Meetings Workspaces list templates.

BICenter Feature Stapler Feature

Enables the provisioning of an Exchange mailbox for sites on this farm and connects the documents from the site to Outlook.

Provides the infrastructure to synchronize metadata for Document Sets.

Provides the content types required for creating and using document sets. Create a document set when you want to manage multiple documents as a single work product.

Enables tenant administration of InfoPath Forms Services Web Service Proxy settings

Adds site-level Excel Services Application viewing features to the Microsoft SharePoint Foundation framework

Deprecated Office Web Apps

Staple Tenant User Profile Application Feature to TenantAdmin Template

Enables the Access Services Add Access Application feature in each site that is created.

BICenter Data Connections Feature

Provides tree view navigation for a site.

Provision resources used in a product catalog site

Staples the Field Added feature to all sites created

My Site feature that shows the same navigation for the host and personal sites.

Installs bulk request and response list on the administration site for managing classes and users.

Installs columns designed to manage information about search configurations.

This feature enables platform functionality that will allow mobile devices to subscribe to notifications for events that happen on this SharePoint site.

SharePoint Portal site templates and web parts

The site collection level fields, content types and webparts required for discussion lists, reputation, categories and membership in a community.

SharePoint Portal Server Business Application content type definitions

Automatically recommend documents and sites for users to follow on their SharePoint MySites.

Uses the Search Server Service for search over broad enterprise content. In addition to list and site scopes, provides search over people profiles, business data, remote and custom content sources. Uses multiple tabs to display results in the Search Center.

PerformancePoint Content List

Installs content types designed to manage search config.

Creates the taxonomy timer jobs on all web apps being created

Create a Small Business Website.

Installs features related to hosting My Sites.

Provides a tile view experience for common SharePoint site actions.

Enable Asset Library Creation for site collection.

Adds site-level Excel Services Application web part features to the Microsoft SharePoint Foundation framework

This feature staples (connects) the My Tasks Dashboard feature to the MySite template.

Provisions a Getting Started with App Catalog Site web part on the welcome page.

Enables translation for Publishing Pages.

Features such as user profiles and search, included in the SharePoint Server Standard License.

Adds class and group content to the SharePoint Class and My Site collections.

The Site Mailbox app helps you keep email and documents close together by connecting your site to an Exchange mailbox. You can then view your email on SharePoint, and view site documents in Outlook.

Adds farm-level Access Services Features to the Microsoft SharePoint Foundation framework

Controls the activation of the site feed feature.

Set per-site navigation properties.

This feature activates the Administrative Reporting Infrastructure feature in all site templates.

Provision safe controls used in Academic Library Site.

This feature provides the server to server authentication capabilities.

Adds the SharePoint 2013 Workflow Task content type to the site.

Allows a site collection to define Device Channels that allow mobile and alternate devices to be served custom optimized versions of the pages on sites.

Creates a Help library that can be used to store custom help for this site collection.

This feature provides support for Resources list types.

Create term-driven rollup pages and page layouts.

Enables Search-Driven Content Web Parts and other related features.

Adds farm-level Excel Services Application Mobile Excel Web Access Feature to the Microsoft SharePoint Foundation framework

OOB field definitions for Biz Apps

This feature enables Alerts and Event Receivers on the External List and External Content Types.

Enable MediaWebPart for site collection.

Provision resources required for creating records or holds in sites within this site collection.

PerformancePoint Data Source Library Template

Search extensions

Create term-driven topic pages.

Use this Picture Library to store logos for Organizations.

Portal feature that uploads all the layouts to the master page gallery.

Enables the Exchange Sync Timer Job for Work Management Service Application. Customizes the ribbon for SharePoint Server Tasks lists, enabling users to opt in and out of the Work Management synchronization with Exchange Server.

View Visio Web Drawings in the browser

This feature uploads files for Search Server center.

This feature enables Alerts and Event Receivers on the External List and External Content Types by activating the dependent features.

Enable the Spell Checking in list-item edit forms.

Provisions a catalog to store apps for Office

Staples the site feed feature to all new Team Site site collections.

Stapling Secure Store Service Tenant Administration to Tenant Administration template.

This feature provides support for Schedule and Reservations list types.

Adds the My Site Instantiation Queue timer jobs on all web apps being created.

This feature uploads all web parts and support files required for Taxonomy Refinement.

Enables UI for creating or upgrading BDC profile pages.

My Site feature that uploads all the layouts to the master page gallery.

Provides standard content type definitions for a site collection.

Installs features related to My Site and User Profiles.

Installs navigation providers for My Site.

Gathers signatures needed to complete a Microsoft Office document.

Adds records management and information management policy capabilities to Microsoft SharePoint Foundation.

This feature staples Blog notifications and likes feature to Blog site templates

Provides libraries, content types, and web parts for storing, managing, and viewing rich media assets, like images, sound clips, and videos.

Provides support for document libraries for a site.

This feature provisions Group Work's web.  
Enables FAST Search End User Help Collection  
Creates reports about information in Microsoft SharePoint Foundation.  
Portal feature that sets the DiscoPage property of the default web service to spsdisco.aspx.  
Provides each list in the site with a settings pages for configuring that list to use metadata tree view hierarchies and filter controls to improve navigation and filtering of the contained items.  
Adds class and group site actions to the SharePoint Community site collection.  
Registers the field added event on all SP Sites being created  
Create term-driven topic pages and page layouts.  
Enables uploading Access template files to the solution gallery.  
InfoPath Forms Services admin links.  
Adds entry points for social tagging and note board commenting to the ribbon user interface.  
Create a large-scale wiki site.

This feature improves the search engine optimization of a website by automatically generating a search engine sitemap on a recurring basis that contains all valid URLs in a SharePoint website. Anonymous access must be enabled in order to use this feature.  
Allow users to acquire apps that require internet facing endpoints from the SharePoint Store.  
Enable users to follow documents or sites.  
adds the url of search center in the property bag of root web.  
Search Center URL Feature.  
Create metadata based rules that move content submitted to this site to the correct library or folder.  
When this feature is enabled, permissions for users in the "limited access" permissions level (such as Anonymous Users) are reduced, preventing access to Application Pages.  
Enables Exchange Task Sync on a given Site Subscription.  
Enables taxonomy tenant administration.  
Enables classes and groups on a SharePoint Web Application.  
Visio Process Repository document library feature  
Visio Process Repository document library feature  
Visio Process Repository document library feature  
Caches class and group user data on SharePoint site collections.  
Adds Access Services Site Actions Menu Items.  
Enhanced HTML Editing for the Content Editor Web Part  
Adds required lists to the SharePoint Class site collections.  
Add a library template to manage the document translation process.  
PPS Site Stapling  
Features such as InfoPath Forms Services, Visio Services, Access Services, and Excel Services Application, included in the SharePoint Server Enterprise License.  
Installs My Site Blog features.  
A technique that delivers a faster and more fluid page navigation experience, in pages and site templates that support it, by downloading and rendering only those portions of a page that are changing.  
Helps you to visualize your data on SharePoint sites and portals.  
Feature stapling for Share with Everyone feature  
Provides an experience for users to manage and interact with his or her tasks, aggregated across sites and systems.  
Enable portal navigation bars.  
Configures links to documents so they open in client applications instead of Web applications, by default.  
SharePoint Portal Server Master Site Directory Capture Control.  
Creates Display Templates that can be used by Content Web Parts.  
workflow service stapler  
This feature uploads HTML files required for Taxonomy Refinement web parts.  
Records Management tenant administration stapling.  
This feature allows you to turn the front page of your Wiki Site into a Wiki Page.  
Provides access to the site collection upgrade and repair logs  
Installs class and group display templates used to show search results.  
The feature is a web part to display popular content, search queries and search results.  
Feature that sets location to local site directory for site metadata capture  
Activates taxonomy related features in the tenant administration site.  
Staples Profile Pages feature to sites that use the tenant admin template.  
Use this feature to enable users to rate content.  
This feature staples the Search Server web parts and support files feature to all templates.

Adds class and group content to SharePoint My Site Host site collection.

Link to display the portal to office server sku upgrade page

This feature contains the list schema and list instance which is used to manage the members within a site like Community, Project, Team, Education sites

Create a Web page library as well as supporting libraries to create and publish pages based on page layouts.

This feature adds community functionality such as discussion categories, content and people reputation, and the members list. It also provisions community site pages which contain these lists and features.

Installs lists for administration of classes and related content on the SharePoint global site collection.

Staple Base features

Links to Tenant Administration subpages which reside on the main Tenant Administration page.

Links to subpages of search administration

Creates a SiteAssets library in the current site.

Allows Tenant Administrators to configure Content Deployment for their sites.

Features such as user profiles and search, included in the SharePoint Server Standard License.

Provisions a site to be Enterprise Metadata hub site.

This feature provides support for Holidays list types.

Installs Claim Hierarchy Provider based on Organizations.

Provides Calendars with added functionality for team and resource scheduling.

This feature will add the Search Server Web Parts and Display Templates to your site. Search will work on most sites without this feature being activated, but if you get a message about missing templates when searching, then activate this feature.

`$Resources:core,GbWFeatureWhereaboutsDescription;`

This feature is used to track external actions like litigations, investigations, or audits that require you to suspend the disposition of documents.

Provisions files used by the premium search verticals.

`Resources:SearchConfigTenantStapler_Feature_Description;`

View Visio Web Drawings in the browser

InfoPath Forms Services lists and related pages to enable server side rendering of Forms.

Allows management of access requests to sharepoint sites

InfoPath Forms Services admin links.

This feature enables entry points from the SharePoint user interface that allow users to browse SharePoint solutions from Office.com

Adds required content types to the SharePoint Class web.

Features enabling the PerformancePoint Services site including content types and site definitions for this site collection.

Feature that creates sites list and registers event receivers

Feature that encapsulates the list that enables users to follow content in SharePoint.

BICenter PPS Content Pages Feature

Enable Publishing prerequisites for site collection.

This feature provides Collect Signatures workflow for a language (pt-PT)

This feature provides Collect Signatures workflow for a language (es-ES)

Routes a page for approval. Approvers can approve or reject the page, reassign the approval task, or request changes to the page. This workflow can be edited in SharePoint Designer.

Adds study group content types to the SharePoint Community web.

Enable Html Design.

Access Services Restricted List Definition

This feature provides support for Circulation list types.

Staple Premium features

Use the cross-farm site permissions feature to allow internal SharePoint applications to access websites across farms.

BICenter Data Connections List Instance Feature

Enable users to follow documents or sites.

Create a large-scale wiki with categories and page layouts.

Adds class and group content types to the SharePoint My Site web.

Uploads aggregated app usage data to Microsoft. Microsoft uses this data to improve the quality of apps in the marketplace. If you have multiple content farms connecting to the same search server, activate this feature only on one farm.

Create Search Config List Instance: Provisions a list to enable the import and export of search configurations

This Feature enables developers to deploy apps under active development to a site.

Enable Publishing for site collection.

Adds the process all tasks button to complete workflows in bulk

Installs job for user profile and membership synchronization with team sites.

Visio Process Repository 2013 Content Types

Features such as user profiles and search, included in the SharePoint Server Standard License.

Add and configure site services addins.

Enables MySite social features.

Deprecated Office Web Apps

Provides content types, site columns, and library templates required to support Reports and Data Search in the Enterprise Search Center.

Assigns IDs to documents in the Site Collection, which can be used to retrieve items independent of their current location.

Workflows that send a document for feedback or approval. These workflows can be edited in SharePoint Designer.

Staple Tenant Business Data Connectivity Administration Feature to TenantAdmin Template

Records Management tenant administration.

Provides standard Site Upgrade links for a site.

\$Resources:obacore,tenantadminbdcFeatureDesc;

Library for administrative reporting.

Provisions files used by Reports and Data Search.

Uses the Search Server Service for site and list scoped searches.

Adds Access Services Site Actions Menu Items.

Adds class and group membership pages to the SharePoint Community site collection.

Adds class and group content types to the SharePoint Community web.

List template used to create the Preservation Hold List.

Adds pages to SharePoint Online for managing classes and institution data.

Installs links related to administering the User Profile service.

Gathers signatures needed to complete a Microsoft Office document. This workflow can be edited in SharePoint Designer.

Manage Profile Service Application.

Creates a sample dashboard in the ReportsLibrary of the parent Report Center

Manages document translation by creating copies of the document to be translated and assigning translation tasks to translators.  
This feature uploads all web parts required for Search Administration Dashboards.

This feature contains the list schema and list instance which is used to manage the offensive content within a community site  
Adds farm-level Excel Services Application web part features to the Microsoft SharePoint Foundation framework  
Aggregated set of out-of-box workflow features provided by SharePoint 2007.

Manages document expiration and retention by allowing participants to decide whether to retain or delete expired documents.  
InfoPath Forms Services lists and related pages to enable server side rendering of Forms.  
Search Central admin Links.

This feature provides support for Microsoft Office Server workflows.

OOB Content Deployment Feature.

Provides standard column definitions for a site collection.

Installs class and group configurations in the SharePoint web application.

Content Deployment Source feature enables content deployment specific checks on source site collection and enables setting up content deployment from the site collection to a target site collection.

Adds Data Connection Library feature

Creates timer jobs in the web application to support translation import and export.

Enables offline synchronization between external lists and Outlook.

Installs the "Add Dashboard" Link in Site Actions menu.

Access web app.

This feature contains the template for the Categories list functionality

Publishing Layouts

Enable a site's content organizer to accept and organize email messages. This feature should be used only in a highly managed store, like a Records Center.

This feature provides support for Time Card list types.

Enables the Access Services Solution Gallery feature in each site collection that is created.

This feature provides support for What's New list types.

Provide document library and other lists in team site with mobile view for smartphone browsers.

When query based preservation is enabled, content stored in the Preservation Library that does not match any hold filter for this site is expired. This feature should generally be used for archive sites that will have multiple concurrent holds.

This feature adds notifications to Blogs

The timer job that processes workflow tasks in bulk

Enable the definition and declaration of records in place.

Content type publishing.

Creates a list template to be used in the Product Catalog site

Enables MySite MicroBlogging services.

Create term-driven rollup page hierarchies.

\$Resources:SearchServerWizard\_Feature\_Desc;

Configures a site as a Records Center.

SharePoint Portal Server Reports and Data content type definitions

Activate Content Following feature on all site collections.

This feature adds project management functionality to a site. It includes tasks, a calendar, and web parts on the home page of the site.

Feature to help Developers build, test and publish apps

Creates the default.aspx page for the a Blog site

Create Search Config Template: Provisions a template for the Search Config List to enable the import and export of search configurations

Adds farm-level Excel Services Application viewing features to the Microsoft SharePoint Foundation framework

Related Links scope settings page

Provisions the necessary resources for an eDiscovery case.

Site Settings Link to Local Site Directory Settings page.

Adds site-level Excel Services Application Mobile Excel Web Access Feature to the Microsoft SharePoint Foundation framework

Enhances the existing SharePoint document library for My Site. Enables new views, lightweight versioning, enhanced contextual information, and per-item sharing.

Enables MySite MicroBlogging List.

My Site feature that shows the same quick launch for the host and personal sites.

This feature uploads all web parts and support files required for Search Center.

Allow workflows to read from and to write to all items in this site.

Personalization Site Description

Out-of-Box Search Portal admin Links.

Workflows activated automatically upon site collection creation

PerformancePoint Monitoring

Installs features related to migrating user data when a user's account information changes.

Creates a Microsoft OneNote 2010 notebook in the Shared Documents library and places a link to it on the Quick Launch. This feature requires a properly configured WOPI application server to create OneNote 2010 notebooks.

Shared Services Infrastructure

Provides a shortcut URL (/m) to a mobile device-accessible version of the list.

PerformancePoint Content Type Definition

Add Published Links fields and content type

Configures a user's personal site.

Provides centralized libraries, content types, master pages and page layouts and enables page scheduling and other publishing functionality for a site collection.

Stores the settings for App Catalog Site

Dashboards Library Description

BICenter PPS Workspace List Instance Feature

Enables offline synchronization for external lists with Outlook and SharePoint Workspace.

Provides support for hierarchy tasks lists for a site.

Adds autohosted app licensing UI elements to the Internal App Directory.

Provides data support to social features

\$Resources:core,blogFeatureDesc;

BICenter PPS Content Navigation Bar Feature

My Site feature that uploads the master page to the master page gallery.

This feature uploads files for Search Server center.

Installs a button on the List Settings page to enable content targeting using audiences.

\$Resources:Core,AppRegistrationTitleFeatureDescription;

Use this workflow to track items in a list.

Provides standard Site Settings links for a site.

Provides standard links for the Content Type Settings page.

Links for the Operations and Application Management pages in the Central Administration site.

TaskListNewsFeed

Adds entry points in the ribbon user interface for creating library shortcuts in the user's SharePoint Sites list if they have a recent version of Office installed. Office will periodically cache templates available in those libraries on the user's local machine.
