The SSRS extension using PivotViewer is very good UX visualization, any plans for that being a part of 'Crescent'. I know LiveLabs > Bing and I spotted the deepzoom strip on a #TEE10 screen. Pardon the pun but this control is looking pivotal for our new UX designs it seems to strike a chord with the users. Once they get it they want it everywhere.

Kind regards

Dave

How is the silverlight controls embedded into powerpoint, as shown in the demo?
