Help silverlight has caused me to loose security updates refuses to allow my Spyware & virus protection to update, it willnot be removed no matter what I do  
Message I get is ; This patch packge could not be opened. Verify that the package exists & that you can access it,or contact the application vender that this is a valid Windows installer patch package. could not remove 3.0406324.0  
Can you come up w/ another work around control panel doesn't work.
